

Mitsubishi FX-Series Advanced using GX Works2 in simple mode

Two-day training course in Blackburn - £1200 per person

This 2-day course explores the more advanced features of the Mitsubishi FX-series PLC family.

Concentrating on the applied instruction set, the course will allow delegates to use the mathematical functions, displaying results and interfacing with analogue units. Delegates are given several practical exercises to solve.

Price and Availability

See our website for a schedule of our training course dates. To book your places & check availability, please e-mail training@lca.co.uk or call 01254 685900.

The cost for the two day course is £1200 plus VAT per delegate.

The cost includes course documentation and a buffet lunch.

What Does the Course Include?

- Advanced programming techniques
- Multi-operation programming
- Using 16/32 bit memory areas
- Special M Coils
- Delay programs
- Master control
- Sub-routines
