

Mitsubishi GOT-Series HMI Introductory Training Course

Two-day training course in Blackburn - £1200 per person

Two-day introductory course explaining the set-up and basic communication between the HMI and PLC.

The course will use Mitsubishi GT Designer3 software and covers the basic dynamic and test objects that are used in most projects.

What Mitsubishi Products Does This Course Cover?

Three courses are available based on the PLC type: Q PLC, IQ-R, or FX PLC simulator system (depending on the course chosen). You will use a special purpose GOT-series HMI rig, PLC rig and GT Designer software.

Price and Availability

See our website for a schedule of our training course dates. To book your places and check availability, please e-mail training@lca.co.uk or call 01254 685900.

The cost for this two-day course is £1200 plus VAT per delegate.

The cost includes course documentation and a buffet lunch.
