
Mitsubishi IEC PLC programming using GX Works2 in structured mode

2-day training course at Blackburn or Chippenham

This 2-day course explains how to program using the IEC 61131-3 standard.

Based on GX Works2 software in structured mode, the course will run through the functions and program editors of the software. Delegates will be able to create programmes and become confident using this package and exploring the features of IEC programming.

Price and availability

See our website for a schedule of our training course dates. To book your places & check availability, please e-mail training@lca.co.uk or call 01254 685900.

The cost for the two day course is £475 plus VAT per delegate.

The cost includes course documentation and a buffet lunch. Note, accommodation is not included.

Course content includes;

- Introduction to the IEC 61131-3 standard
- Introduction to GX Works2 programming
- Program structuring
- Variable types and definitions
- Program languages
- Compiling
- Functions
- Function blocks
- Monitoring
- Libraries
- Backup and restore

Skills requirement

- Previous experience of Mitsubishi PLC programming is required.
- Some experience of other structured programming environments would also be advantageous

Courses must be booked in advance either by full payment or a valid purchase order number. Cancellations received less than 1 month prior to course start date will be subject to a 50% charge, (less than 2 weeks prior to course start date, the full fee is payable). Substitute delegates are welcome at any time with no extra charge. We reserve the right to alter or cancel dates and the full fee will be returned in these cases.
