

Q-Series PLC Advanced using GX Works2 in simple mode

Two-day training course in Blackburn - £1200 per person

This 2-day course explores the more advanced features of the Mitsubishi Q-Series PLC.

Concentrating on the applied instruction set, the course will allow delegates to use the mathematical functions, displaying results and interfacing with analogue units. Delegates are given a number of practical exercises to solve.

Price and Availability

See our website for a schedule of our training course dates. To book your places & check availability, please e-mail training@lca.co.uk or call 01254 685900.

The cost for the two day course is just £1200 plus VAT per delegate.

The cost includes course documentation and a buffet lunch.

What Does the Course Include?

- Advanced programming techniques
- Multi-operation programming
- Using 16/32 bit memory areas
- Special M Coils
- Delay programs
- Master control
- Sub-routines
