

# Q-Series PLC Introduction using GX Works2 in simple mode

Two-day training course in Blackburn - £1200 per person

This 2-day course is an introduction to the Mitsubishi Q-Series PLC.

The course explains the basic hardware structure and introduces the first basic steps of PLC programming using GX Works2 software in simple mode with labels. At the end of this course, delegates will be able to create and understand basic PLC programs.

## Price and Availability

See our website for a schedule of our training course dates. To book your places & check availability, please e-mail [training@lca.co.uk](mailto:training@lca.co.uk) or call 01254 685900.

**The cost for the two day course is just £1200 plus VAT per delegate.**

The cost includes course documentation and a buffet lunch.

## What Does the Course Include?

- PLC hardware
- GX Works2 software in simple mode
- Creating a ladder diagram
- Program testing
- Program transfer (Up/Down loading)
- Simple application programs
- Simulation and monitoring

## What Skills Do I Need?

- No previous experience of Mitsubishi PLC's is required although some PLC knowledge would be useful.
- You will need an understanding of basic electrical principles (number bases would also be an advantage)

## Suggested Further Courses

- Mitsubishi Q-Series - Advanced (2 days)
