

# Mitsubishi iQ-F Introduction using GX Works2 in simple mode

Two-day training course in Blackburn - £1200 per person

This 2-day course is an introduction to the Mitsubishi iQ-F PLC family.

The course is designed to enable engineers to select the correct hardware and create reliable programs for simple applications. The course will also cover configuration of the main PLC parameters, to ensure that projects created in GX Works2 are complete.

---

## Price and Availability

See our website for a schedule of our training course dates. To book your places & check availability, please e-mail [training@lca.co.uk](mailto:training@lca.co.uk) or call 01254 685900.

**The cost for the two day course is £1200 plus VAT per delegate.**

The cost includes course documentation and a buffet lunch.

---

## What Does the Course Include?

- Hardware selection
- Module placement and addressing
- Setting up GX Works2 software
- Creating programs for simple applications
- Basic program elements
- Designing a sequence using timers
- Programming pitfalls
- Creating and testing a program
- Alternative solutions and editing a program offline
- PLC configuration parameters

## What Skills Do I Need?

- No previous experience of Mitsubishi PLC's is required although some PLC knowledge would be useful.
- You will need an understanding of basic electrical principles (number bases would also be an advantage)
