

Mitsubishi iQ-R Advanced using GX Works2 in simple mode

Two-day training course in Blackburn - £1200 per person

This 2-day course builds on the knowledge and skills from the Mitsubishi iQ-R intermediate course.

The course will enable delegates to configure and use the advanced features of the iQ-R PLC and create clearly structured programs to perform complex operations.

A similar course using Structured Mode programming is also available (see our latest training schedule for details).

Price and availability

See our website for a schedule of our training course dates. To book your places & check availability, please e-mail training@lca.co.uk or call 01254 685900.

The cost for the two day course is £1200 plus VAT per delegate.

The cost includes course documentation and a buffet lunch.

MELSEC iQ-R
series
