
Mitsubishi Q-Series Introduction using GX Works2 in simple mode

2-day training course at Blackburn or Chippenham

This 2-day course is an introduction to the Mitsubishi Q-Series PLC.

The course explains the basic hardware structure and introduces the first basic steps of PLC programming using GX Works2 software in simple mode with labels. At the end of this course, delegates are expected to be able to create and understand basic PLC programs.

Price and availability

See our website for a schedule of our training course dates. To book your places & check availability, please e-mail training@lca.co.uk or call 01254 685900.

The cost for the two day course is £475 plus VAT per delegate.

The cost includes course documentation and a buffet lunch. Note, accommodation is not included.

Course content includes;

- PLC hardware
- GX Works2 software in simple mode
- Creating a ladder diagram
- Program testing
- Program transfer (Up/Down loading)
- Simple application programs
- Simulation and monitoring

Skills requirement

- No previous experience of Mitsubishi PLC's is required although some PLC knowledge would be useful.
- You will need an understanding of basic electrical principles (number bases would also be an advantage)

Suggested further courses

- Mitsubishi Q-Series - Advanced (2 days)

Courses must be booked in advance either by full payment or a valid purchase order number. Cancellations received less than 1 month prior to course start date will be subject to a 50% charge, (less than 2 weeks prior to course start date, the full fee is payable). Substitute delegates are welcome at any time with no extra charge. We reserve the right to alter or cancel dates and the full fee will be returned in these cases.
