

RED LION CRIMSON SOFTWARE

TRAINING COURSE

**1 DAY
£275**

Crimson is Red Lion's powerful programming software for Graphite® HMI, G3 HMI, CR1000, CR3000, Modular Controllers, Core and Edge Controllers, PTV and Data Station Plus.

The latest release of Crimson software features a number of new drivers, including an enhanced version of the Emerson ROC driver and a new CANopen PDO Slave driver - in fact over 300 protocols are now available with Crimson.

With multiple protocol support built into every Red Lion HMI operator interface product, a second protocol can be chosen to acquire data from the original driver. Once collected, the HMI operator panels, Modular Controllers and Data Station Plus can convert the data to a different protocol so that it can be integrated with virtually any PLC, PC or SCADA system.

The data may also be recorded in IT-friendly CSV file format for later review, using the built-in data logging facilities.

Crimson Software is free. Our training course will help you to make the most of it. Download yours www.redlion.net/red-lion-software/crimson

Price and availability

See our website for a schedule of our training course dates. E-mail training@lca.co.uk or call 01254 685900 to check availability and book your places.

The cost for this one day course is £275 plus VAT per delegate, including course documentation and a delicious buffet lunch.
