## MAC & E Series HMIs

Ever since their introduction in the mid-80's MAC and E-Series terminals have been the UK's most popular HMIs.

Through constant development, modern HMIs now offer levels of functionality previously only available on larger PC-based SCADA systems. There has also been a continual migration from key-operated terminals to touch-screen versions, which offer more flexibility, clearer configuration and a more operator-friendly experience.

As with all other Mitsubishi products the need for backward-compatibility of HMI terminals is seen as an essential product feature. The beauty of having just one single programming tool for our entire HMI range makes the extraction and updating of HMI projects from older, installed HMIs to modern, high functionality ones really easy.

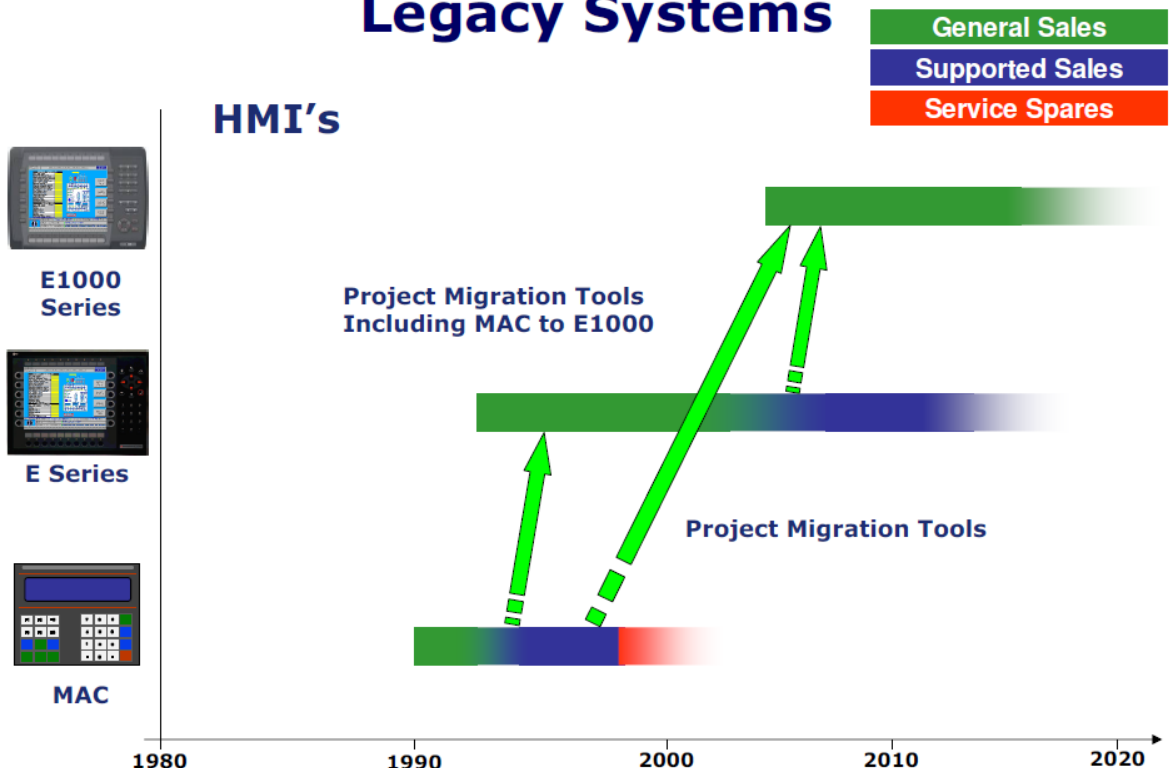

Mitsubishi Electric is constantly researching and applying the latest technology to its range of Automation products. This inevitably leads to new product ranges and series being developed which bring ever greater benefits of increased operational life and new functions that simplify complex tasks.

This natural design and development cycle means that there are sometimes older generation products which may still have leading performance and operability but are no longer the main product line offered by Mitsubishi Electric in Europe. These items now form part of our "Silverline" range.

## Legacy Systems

# Simplicity of Upgrade

As would be expected from a world leading supplier, Mitsubishi Electric has ensured, as part of its ongoing support of product, that there is always an upgrade path from any of the previous generation hardware products into the latest generation with only minor alterations being required. Backward compatibility is a fundamental design principle.

## E1000 Range:

E1012	Function key LCD Screen
E10222	Function key LCD Screen
E1032	Function key LCD Screen
E1060/61/63	Function key & touch-screen 5.7" TFT
E1070/71	Function key & touch-screen 6.5" TFT
E1100/01	Function key & touch-screen 10.4 " TFT
E1151	Touch-screen 15" TFT

## Your next step

Our Technology Partners are automation equipment specialist distributors and provide full technical information and support, you can lean on their experience and expertise. To find the details of your local Partner, browse the Contact page of our Automation Website :[www.automation.mitsubishielectric.co.uk](http://www.automation.mitsubishielectric.co.uk)

While on our Website, sign up for "MyMitsubishi" to gain access to a full library of manuals to download, FAQ's to browse, and configuration tools to make your life easier. Where possible legacy manuals have been scanned and uploaded to this site.

We also recognise that sometimes only a site visit will do. Mitsubishi Electric provides a professional on-site service through its Service Agent and Service Centre networks.

Contact our Help Desk to access a broad range of on site support for Mitsubishi Automation's products. Experienced qualified engineers with the correct diagnostic, calibration and repair equipment, as well as the right replacement parts, are able to get you up and running in the shortest possible time.
