Jet Towel

The hand dryer that can cut your energy costs

Where ever it is used, Mitsubishi's Jet Towel has a positive impact. The energy efficient operation and sustainable build benefits the global environment, reducing CO2 and waste products. Washroom clients enjoy the quiet operation, innovative design and cleanliness of the Jet Towel environment.

ULTRA
EFFICIENT
560w

Low Energy Operation

Low power motor technology designed to save energy and Jet Towel's optimum control creates an efficient drying experience whilst reducing CO2 emissions and lowering running costs.

Quiet
operation
59dB

Quiet Operation

At sound levels of only 59dB, Jet Towel is one of the quietest hand dryers available.

Quick drying
10-12
seconds

Fast Drying Times

The hyper nozzle design directs a high performance blade of air across the hands to gently remove and capture excess water from the hands in less than 12 seconds.

Antimicrobial
Material

Hygienic Operation

The Jet Towel is designed for "zero contact" operation which, along with air flow control and the construction of the hand dryer, ensures that water is fully captured making it one of the world's most hygienic hand dryers.

Better for
the
environment

Environmentally Friendly

The highly efficient Jet Towel not only reduces CO2, but also eliminates unhygienic waste, costly disposal and the chemical detergents associated with traditional washroom hand towels.

Long life
service

Long Service Life

The Jet Towel is designed for reliable operation over many years, minimising maintenance and ownership costs.

Instant-
warm
Heater

Instant Warm Heater

Optional instant warm heaters offer extra comfort in cooler environments such as warehouses or cool rooms, and can be switched off during warm periods.

Summary of key features

- Fast drying times
- Non contact drying
- Ultra efficient motor
- No water leakage
- Superior hygienic solutions
- Very quiet operation
- Long service life
- Instant warm heater
