Migration by Design

Servo and Motion

Over many years technology has progressed making it possible to reduce the size of the amplifiers and motors while also increasing their performance. This means upgrading your machine will not only maintain its reliability but potentially increase its throughput.

Mitsubishi Electric has been a leader in High Performance servo systems since 1982. The current line up of MR-J3 servos are fully compatible with all applications.

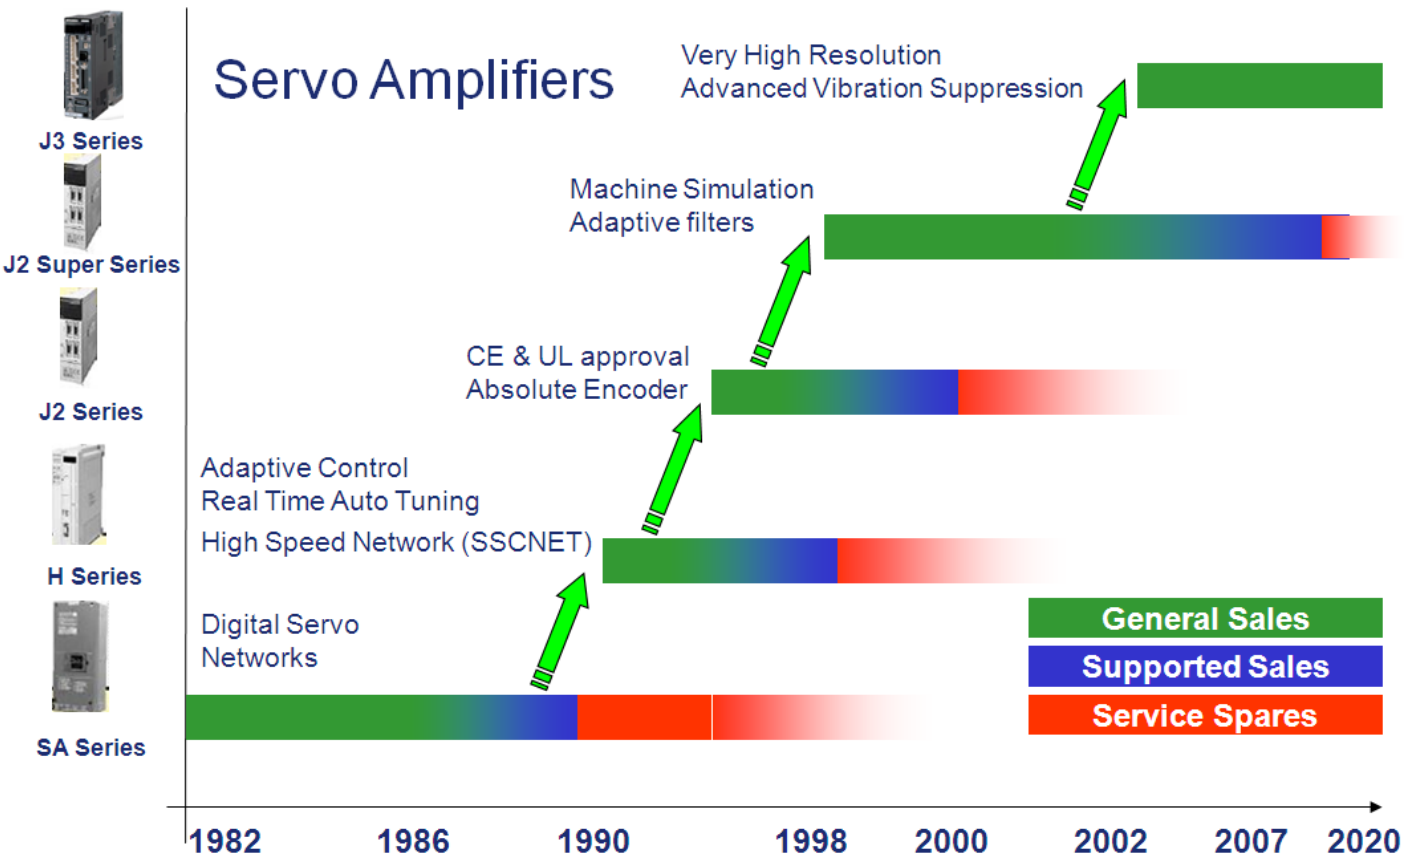

Servo parameters from previous generations amplifiers are easily converted with the MR-Configuration software, and many of the motors have the same flange size as previous generation models..

Mitsubishi Electric is constantly researching and applying the latest technology to its range of Automation products. This inevitably leads to new product ranges and series being developed which bring ever greater benefits of increased operational life and new functions that simplify complex tasks.

This natural design and development cycle means that there are sometimes older generation products which may still have leading performance and operability but are no longer the main product line offered by Mitsubishi Electric in Europe. These items now form part of our "Silverline" range.

Simplicity of Upgrade

As would be expected from a world leading supplier, Mitsubishi Electric has ensured, as part of its ongoing support of product, that there is always an upgrade path from any of the previous generation hardware products into the latest generation with only minor alterations being required. Backward compatibility is a fundamental design principle.

Your next step

Our Technology Partners are automation equipment specialist distributors and provide full technical information and support, you can lean on their experience and expertise. To find the details of your local Partner, browse the Contact page of our Automation Website : www.automation.mitsubishielectric.co.uk

While on our Website, sign up for “MyMitsubishi” to gain access to a full library of manuals to download, FAQ’s to browse, and configuration tools to make your life easier. Where possible legacy manuals have been scanned and uploaded to this site.

We also recognise that sometimes only a site visit will do. Mitsubishi Electric provides a professional on-site service through its Service Agent and Service Centre networks.

Contact our Help Desk to access a broad range of on site support for Mitsubishi Automation’s products. Experienced qualified engineers with the correct diagnostic, calibration and repair equipment, as well as the right replacement parts, are able to get you up and running in the shortest possible time.

Global Partner. Local Friend.
